Portafolio: <https://claudia-ma.github.io/claudia-portfolio/>

PROFESSIONAL PROFILE

Junior Frontend Developer specialized in Angular, with experience building real-world applications connected to APIs, authentication systems, and data management.

Background in design and digital marketing, bringing strong visual judgment, UX awareness, and a product-oriented mindset.

Motivated to write clean, structured, and maintainable code, with a strong interest in growing within technical teams and contributing to scalable products.

EDUCATION

Training in Frontend and Backend Development, focused on:

- Angular
- JavaScript / TypeScript
- APIs and application logic
- Web development best practices

PREVIOUS EXPERIENCE

Previous experience in design and digital marketing, currently applied to frontend development by bringing visual sensitivity, clear communication, and strong user experience awareness.

TECHNICAL STACK

Frontend: Angular (Standalone Components), TypeScript, HTML5, CSS3, Routing, Forms, UX/UI fundamentals applied to product design

Backend / Integration: REST API consumption, Token-based authentication (Sanctum), Frontend-backend integration.

Tools: Git / GitHub, VS Code, product-oriented development approach, clean code organization and best practices.

LANGUAGES

Spanish: Native

English: Intermediate

FEATURED PROJECTS

TeamPulse

Internal task management application with authentication, roles-ready architecture, and tasks connected to a real backend API.

- Token-based login (Laravel Sanctum)
- Task listing and updates (PATCH)
- Architecture designed with real product logic in mind
- UX feedback: loading and error states
- Filtering and sorting
- HTTP interceptor injecting Bearer token

Stack: Angular • Laravel API • Sanctum • MySQL / SQLite
